

PRODUCT DATA

HOUGHTO-GRIND[®] 4253-B

COBALT INHIBITED GRINDING FLUID

Houghto-Grind 4253-B is designed to inhibit Cobalt leaching associated with the grinding of carbide components. **Houghto-Grind 4253-B** combines excellent rust protection with low foaming characteristics and long sump life. It was formulated to reject tramp oil that can cause smoking or misting and premature spoilage of a coolant.

Houghto-Grind 4253-B is formulated with a combination of ingredients that provide a greater resistance to microbial degradation of the fluid.

Field tests have shown that the synergies of the components in this product will reduce the frequency of sumpside additions of antimicrobial agents.

TYPICAL CHEMICAL AND PHYSICAL PROPERTIES

Appearance, undiluted	Amber liquid
Appearance @ 5%	Clear, colorless solution
pH, 5% solution	9.0
Density, pounds/gallon	8.9

CONCENTRATION DETERMINATION

Houghto-Grind 4253-B solutions are easily checked using an American Optical Refractometer. Simply multiply the refractometer reading by 2.4 to obtain product concentration.
